DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim 1, drawn to a fat composition of high purity diglyceride containing conjugated linoleic acid.

Group II, claims 2-6, drawn to a method of preparing a fat composition of high purity diglyceride.

Group III, claims 7-10, drawn to a method of preparing a fat composition of high purity diglyceride.

Group IV, claim 11, drawn to a food additive comprising a fat composition.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical feature described in Claims 1, 2, 7 and 11, which is a fat composition of high purity diglyceride containing conjugated linoleic acid is either obvious or anticipated by US 6,432,453 B1 ('453) and/or US 2002/047356 A1 ('356).

Both US 6,432,453 B1 ('453) and US 2002/047356 A1 ('356) teach food supplement compositions comprising glycerol esters of conjugated linoleic acid, wherein the glycerol esters are selected from the group consisting of monoglyceride, diglyceride, triglyceride and mixtures thereof ('453 abstract, claims 1-3; and '356 abstract, claims 1, 3, 5). Both also teach various methods of preparing the diglyceride conjugated linoleic acid such as transesterification, dehydrating castor oil, isomerizing vegetable oil, or via acid by reacting CLA and glycerol ('453, col. 5, lines 35-41; and '356, claims 11-16).

Accordingly, the special technical feature linking Groups I, II, III, and IV (a fat composition of high purity diglyceride containing conjugated linoleic acid) does not provide a contribution over the prior art, and no single general inventive concept exists. Therefore, restriction is appropriate.

Due to the complexity of the action, the action was submitted in writing.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i)
